

## Line Sym - Name Activity

1. Fold paper in half. In pencil, write your name, filling as much of the paper as possible. Ensure each letter touches the fold line. Any descenders, like y, p, g,..., ignore them for this activity - nothing should cross the fold line.
2. Copy your pencil lines in marker.
3. Flip over the still folded paper and trace your name (backwards on this side) onto the other half of the paper.
4. Open it up, colour it, and/or add details, **symmetrically to both sides**, to make a creature out of your name. :)
